SUMMARY

Data Scientist with 9+ years of experience in: 1) integrating AI, ML, and Statistics into needle-moving financial forecasts and 2) breaking down complex business problems into technical solutions

EXPERIENCE

Paramount+ May 2023 - Present
Vice President, Data Science *Remote*

- Collaborate with finance, marketing, and strategy teams to blend statistical models into subscription-revenue forecasts driving 9-figure allocation decisions
- Lead causal modeling to estimate the incremental impact of pricing, marketing, product initiatives, and distribution strategy, and using estimates to create future forecasts
- Built end-to-end MLOps deployment of financial models, enabling stakeholders to independently use the models, multiplying the models' impact
- Collaborated across marketing and product teams on analyses leading to immediate 7-figure ROIs
- Sponsored creation of dashboard suite depicting variance between subscription KPIs and their forecasts; delivering timely insights to executive team
- Organize annual Paramount AI-ML-Analytics conference; attended by 2500 Paramount Employees

Showtime Networks Inc May 2017 - May 2023
Data Scientist → Senior Director, Data Science *Remote*

- Collaborated with finance and distribution teams to blend statistical models into subscription-revenue models driving 9-figure allocation decisions
- Created end-to-end MLOps framework that automatically refreshed ML models, measured model performance, and alerted when necessary
- Built and maintained Databricks workspace used by data professionals throughout Showtime
- Worked with senior leadership to develop a mathematical model informing 9-figure content (SHO Original Series) allocation decisions

EDUCATION

University of Iowa *June 2015*
PhD in Psychology
Concentration in Experimental Psychology

TECHNICAL SKILLS

Computer Languages/Frameworks	Python, Spark (PySpark), Bash
Databases	SQL (PostgreSQL, HiveQL, MySQL, BQ)
Cloud Computing Platforms	AWS, GCP
Operating Systems	Linux (Ubuntu, Debian), OSX, Windows
